📋 RandaVeri — End-to-End Test Checklist

Complete this checklist to verify all user-facing flows work correctly end-to-end.

📅 March 2026 | 🏷 Version 1.0 | 🔗 Admin: randaveri-admin.vercel.app | 🔗 App: randaveri.vercel.app

Legend: ADMIN Admin Portal only | APP User Frontend only | BOTH Applies to both portals

01 Admin Portal Setup

Admin Portal

- [ ] **Login as Super Admin** ADMIN
  Navigate to admin portal → enter username `admin` and password → verify successful login and dashboard loads.

- [ ] **Verify Analytics Tab displays data** ADMIN
  Open Analytics tab → verify trend charts, validation heatmap, and error breakdown are visible.

- [ ] **Create a new Organisation** ADMIN
  Organisations → Add Organisation → fill name, slug, admin email, set subscription price → submit → verify creation email is sent to admin.
  - [ ] Confirm organisation appears in the list
  - [ ] Confirm org admin receives verification email (check inbox)
  - [ ] Verify email link redirects to the *user frontend* (not admin portal)

- [ ] **Edit Organisation details** ADMIN
  Open org → edit name/subscription price → save → verify changes persisted on refresh.

- [ ] **Create/Edit Admin Roles (Permissions)** ADMIN
  Roles tab → Create Role → assign specific permissions → save → assign role to a staff user → verify permissions apply.

- [ ] **Create Admin Staff User** ADMIN
  Users tab → Create User → fill details → assign role → submit → verify verification email sent to admin portal URL.

- [ ] **Edit a staff user's role** ADMIN
  Users tab → Actions → Edit Role → change role → save → verify new role reflected.

- [ ] **Manage Tiers (Pricing)** ADMIN
  Tiers tab → update Annual Subscription Fee → save → verify amount reflected on user frontend lock screen.
  - [ ] Create a new tier with a custom unit cost
  - [ ] Edit an existing tier's unit cost

- [ ] **System Settings — Branding** ADMIN
  System Settings → change platform name or primary colour → save → verify change reflects on user frontend login page.

- [ ] **Audit Logs visible** ADMIN

Open Audit Logs tab → verify activity entries are listed with timestamps and actor names.

02 Organisation Admin — First Login & Subscription

User Frontend

- [ ] **Org Entrance — Enter Organisation slug** APP
  Navigate to app frontend → enter organisation slug → verify branding (logo/colours) updates → continue to login.
- [ ] **Verify Email (Org Admin)** APP
  Click verification link from email → page should redirect to frontend login (not admin portal).
- [ ] **Login as Org Admin** APP
  Enter org admin credentials → verify login succeeds → subscription lock screen should appear.
- [ ] **Yearly Access subscription screen** APP
  Verify the displayed fee matches what was set in the Tiers tab → click "Activate Yearly Access" → confirm payment → verify dashboard unlocks and 100 bonus units are awarded.

03 NIN Verification Flow

User Frontend

- [ ] **Perform a NIN Lookup** APP
  Dashboard → Verification tab → enter an 11-digit NIN → click Verify → verify result displays (name, DOB, photo) within a few seconds.
- [ ] **Unit balance deducted after verification** APP
  Check wallet balance before and after a NIN lookup to confirm 1 unit is deducted per query.
- [ ] **Verification result slip — Print / Download** APP
  After a successful lookup, click Print → verify the verification slip renders correctly.
- [ ] **Verification Logs** APP
  Verification → Logs sub-tab → verify previous queries are listed with NIN, status, and timestamp. Test date filters.
- [ ] **Invalid NIN handling** APP
  Enter a non-existent / incorrect NIN → verify a user-friendly error message is shown and no unit is deducted.

04 Team Management

User Frontend

- [ ] **Create a Team Member — Verification Access** APP
  Team tab → fill form, set Role = Verification Access → submit → verify email sent to new user.
  - [ ] Verify email link redirects to org frontend (not admin portal)
  - [ ] Login as new user → only Verification tab should be visible
- [ ] **Create a Team Member — Administrator** APP
  Team tab → fill form, set Role = Administrator → submit → login as new user → all tabs (Verification, History, Team) should be visible.
- [ ] **Edit a team member's role** APP
  Team tab → Actions → Edit Role → change role from Verification Access to Administrator → save → verify update saved.
- [ ] **Suspend / Activate a team member** APP
  Team tab → Actions → Suspend → enter org admin password → confirm → verify user status changes to Inactive.

05 Transaction History & Top-Up

User Frontend

- [ ] **View Transaction History** APP
  History tab → verify all NIN validations and subscription payments appear with correct amounts and timestamps.
- [ ] **Top-Up Units** APP
  Dashboard → Top-Up button → enter number of units → confirm payment → verify balance increases and transaction recorded in history.
- [ ] **Date filter on history** APP
  Apply start/end date filters → verify only records within the date range are displayed.

06 Password & Account Management

BOTH PORTALS

- [ ] **Change Password** BOTH
  Settings / Account → enter current password and new password → save → logout → login with new password → verify success.
- [ ] **Forgot Password flow** BOTH
  Logout → Forgot Password → enter email → check inbox for reset link → click link → set new password → login → verify success.
- [ ] **Logout** BOTH
  Click logout → verify token is invalidated → navigating to /dashboard redirects to login.

07 UI / UX Checks

BOTH PORTALS

- [ ] **Dark / Light mode toggle** BOTH
  Click theme toggle → verify all UI elements adapt correctly to both modes.
- [ ] **Responsive layout (mobile)** BOTH
  Open DevTools → toggle mobile view (375px) → verify no overflow, navigation is usable, forms are readable.
- [ ] **Error messages are user-friendly** BOTH
  Test wrong login credentials, empty form submissions, invalid NIN → verify clear error messages appear without technical jargon.
- [ ] **No console errors in browser** BOTH
  Open DevTools Console → navigate through all major pages → verify no red errors appear.
